

ATS Project Success:

Six months ago my son Jared was not very good at math. Even though my husband and I worked with him everyday to help him improve he still struggled. We decided as a last resort to enroll him in your program.

The results were amazing! Not only did his grades improve but his attitude about math did as well. He went from struggling with multiplication to excelling at it. My husband and I could never thank you enough.

When Miss Sarahanne asked if I would like to write a letter about my experience with ATS Project Success I did not hesitate to say yes. As a matter of fact for the first time in my life I wrote a letter to my state representative (regarding your program). We hope ATS is around next year so that Jared may have the opportunity to participate next year.
