To Whom It May Concern:

It is my pleasure to write a letter of recommendation for ATS Project Success. ATS Project Success has provided Supplemental Educational Services (SES) to the students in Leon County, Florida, since the program began here six years ago. During this period ATS Project Success has been one of the most organized of all SES Providers who have contracted to serve in our county. They have always been on task by contacting parents quickly and starting services on time. Their invoices and all required paperwork have always been submitted to the district in a timely manner and with profound accuracy. Their staff is highly professional. Through their expertise of the Cayen software, ATS Project Success was instrumental in helping our school district learn the program.

I would like to add that ATS Project Success has never been discouraged if enrollment was low. They readily accepted the few students. Today they are one of the major Providers of SES services in our county. ATS Project Success has supported several of our county's educational events including donations toward the success of the Capital Regional Science and Engineering Fair.

I sincerely believe that ATS Project Success would make a valuable contribution to your school system and I highly recommend them to your serious consideration.

Sincerely,

Laura
