

Dear Crystle,

My child and I would like to start off with saying that we enjoyed working with you and your company. I have noticed since starting the program that Kylie has been more attentive at her schoolwork and her progress has increased ten fold. Her teacher at school was asking if we were doing anything different at home because she has noticed a vast improvement in Kylie's abilities I told her I owe it all to the SuccessMaker Program. I would like to thank you for all the personal attention you have given us and hope that you continue this program for all the other struggling students out there who just need a different approach. Again that you and please continue with all the great work you guys do.

Sincerely,

Crystal
